CHETWYND PART OF AREA COVERED BY NEW RESCUE SERVICE

TEAAM Aeromedical is Canada's only non profit advanced life support/critical care aeromedical rescue program. Chetwynd and the North Peace now have access to the highest level of aeromedical rescue care. TEAAM provides aeromedical rescue care beyond the reach of traditional ambulance services, and usually performs their life and limb saving missions in 1/10 of the

traditional timeframe.

TEAAM is based on a hybrid membership and insurance based program and covers much of the province based out of Squamish, Prince George, and Fort St John.

Submitted by Ramona Davidson

MEXICO AND QUEBEC FIREFIGHTERS TO HELP WITH WILDFIRES

A contingent of 100 Mexican firefighters and an additional 20 Quebec firefighters are coming to British Columbia to assist the BC Wildfire Service as the province continues to be impacted by hot weather, dry conditions and aggressive wildfire behaviour.

"We're deploying all available resources to respond to hundreds of wildfires across the province, and will continue to do everything possible to protect communities," said Mike Farnworth, Minister of Public Safety and Solicitor General.

Houses are the abiding joys; they are the most emotion-stirring of all things. An automobile is regarded with fond affection, a typewriter becomes an inseparable companion, clothes can stir sentimentality, and the bit of bric-a-brac is a toy one would weep to see torn away — but houses are real, deep, emotional things. How much excitement in the cutting of a window, what enormous importance in the angle of a roof! Albanians are right in knowing that far worse than to kill the criminal or the enemy is to burn his house.

MEXICO AND QUEBEC FIREFIGHTERS TO HELP WITH WILDFIRES

Continued from front page

"We are grateful for firefighters from Mexico and Quebec who will help strengthen our wildfire response and protect British Columbians."

The 20-person unit crew from Quebec will arrive on Friday, July 16, 2021, accompanied by one agency representative.

The 100 firefighters from Mexico are expected to arrive in Abbotsford on Saturday, July 24, 2021, accompanied by one COVID-19 safety officer and two agency representatives.

"We appreciate the firefighting assistance we're receiving from other Canadian provinces and from Mexico," said Katrine Conroy, Minister of Forests, Lands, Natural Resource Operations and Rural Development. "These crews are a welcome addition to our own firefighters and contractors, who are working extremely hard to help keep B.C. communities safe."

The new arrivals will be deployed to work on wildfires in the Interior under the direction of the BC Wildfire Service, with strict COVID-19 protocols in place. The Mexican firefighters will be tested for COVID-19 prior to leaving Mexico and again on their arrival in British Columbia. They will also be offered COVID-19 vaccinations before being deployed in B.C. The Quebec and Mexico crews will live and work in operational "bubbles" apart from B.C. crews to minimize COVID-19 risks. They will also remain in their own bubbles when away from the fire lines. The COVID-19 protocols in place are similar to those experienced by B.C. firefighters who were deployed to Quebec, Manitoba and Ontario this year.

Requests for out-of-province assistance are made through the Canadian Interagency Forest Fire Centre (CIFFC), which co-ordinates the sharing of firefighting resources within Canada. Incoming firefighting crews are trained to CIFFC standards and will be deployed where they are needed most in the province.

The cost of bringing in firefighting personnel (e.g., firefighters, wildfire management professionals and support staff) from other provinces or countries is covered by the B.C. government.

British Columbians are urged to be especially careful and vigilant over the coming weeks as aggressive wildfires continue to burn in many areas of the province, due in part to hot and dry conditions caused by record-breaking temperatures earlier this fire season. The BC Wildfire Service also reminds people that campfires and all open burning are currently prohibited throughout B.C.

To report a new wildfire or an open burning violation, call 1 800 663-5555 toll-free or *5555 on a cellphone.

WHY WE YAWN?

The most popular, but likely wrong, theory is that yawning increases levels of oxygen to the brain. A more plausible theory: Yawning cools the brain down. A study conducted on mice found that as mice sucked in air, their jaws stretched—this increases blood flow to the brain. This combination of cooler air intake when yawning mixed with the blood flowing to the brain is thought to eventually cool the brain down.

"C" IS THE MOST COMMON KEY USED IN POP SONGS?

A man analyzed 1,300 songs from the Top 100 charts in pursuit of patterns. As for chords, he discovered that the most common key in music is C, ranking at 26 percent. Popular songs in the key of C include Bruno Mars' "When I Was Your Man" and "Take Me to Church" by Hozier.

GOATS HAVE EMOTIONAL INTELLIGENCE?

Research shows that goats are socially aware of the environment they're in. They can "differentiate between other goats' happiness or displeasure by listening to their voices," according to National Geographic.

THE FASTEST REPTILE IS THE SEA TURTLE?

Marlin and Dory had a wild ride when they went for a cruise on Crush's back. And it seems that scene has a basis in truth: Sea turtles can swim as fast as 35 mph.

Thinking no one could hear me as I loaded a UPS tractor trailer, I began to whistle. I was really getting into it when a coworker in the next trailer poked his head in. "You know, I always used to wish I could whistle," he said. "Now I just wish you could."

*Did You
Know?*

**THERE'S A SECRET VAULT THAT HOLD
NEARLY EVERYTYPE OF CROP SEED?**

It's the Svalbard Global Seed Vault, located in one of the coldest corners of the world: an island on the Svalbard archipelago, between Norway and the North Pole. This remote location allows the natural permafrost cooling necessary for proper storage of the world's largest collection of crop diversity. If the zombie apocalypse were to become a reality, or just if farmers' fields start to dry out, this seed vault would come to the rescue.
