## NH CRITICAL CARE CAPACITY

Northern Health is experiencing an increase in COVID-19 activity and hospitalizations for COVID-19 patients requiring critical care. We are focused on ensuring the health system has capacity to offer quality care to both non-COVID-19 and COVID-19 patients, working in partnership with other health authorities, the Ministry of Health and the BC Centre for Disease Control.

As part of the provincial response to COVID-19, patients may be transferred to locations elsewhere within the health system for care. Northern Health and the Province have structures and planning in place for the health care system to deliver care to the most critically ill patients, and to maximize capacity.

We can confirm patients have been transferred from Northern Health to other health regions of BC authorities for care during the pandemic. Provincial transfer protocols are in place to support patients, and those protocols include strict COVID-19 health and safety measures. The provincial and regional plans are in place to deliver care as we see increases in numbers of people in hospital for COVID-19, and to inform how we move people around the region and province - if that's required.

We can't predict precisely what referral or transfer patterns may look like - especially for individual patients or locations; those decisions would be based on the care needs of a patient, and available hospital (inpatient and staffing) capacity in any given area at the time.

Across Northern Health, we have 41 critical care 'base' beds, and an additional 23 'surge' critical care beds (surge capacity can be scaled up or down, depending on need), and approximately 100 ventilators available to support critical care, including transport ventilators (this number is approximate as additional ventilators continue to arrive and be put into service). All NH sites have transport ventilators; there is also a provincial supply of ventilators that can be deployed to areas of need. Finally, each of our hospitals has a pandemic plan, which includes identifying where patients would be cared for based on their care needs.

Answer to puzzle no. 785 (ran on Tues, Dec 1)

*Failure is the condiment that gives success its flavor.*

Four students walked in halfway through the American history test my father was giving at the local community college. "Sorry," they said, "we had a flat tire." An understanding man, Dad said that if they could all answer just one question correctly, he would give them each an "A" for the exam. The students agreed. So my father handed each one a piece of paper, placed them in four separate corners and said, "Write down which tire was flat."

## Billie Jeanne Hauber

April 10, 1948 - November 29, 2020

It is with heavy hearts that we announce the passing of our Mom, Nanny, Sister and Aunt Billie Jeanne Hauber. Billie passed away on November 29, 2020 after a brief but courageous battle with cancer.

Billie is survived by her son Lorne, her daughters Debbi (Lionel), Barbie, Deanna (Ted) and Becky (Vince), 10 grandchildren, 6 great grandchildren, 5 sisters and many nieces and nephews. Billie will be sadly missed by us and many others who knew her as their "Nanny" as well as many friends and extended family.

Due to the current COVID-19 restrictions there will be no funeral service at this time. Billie will be cremated and later laid to rest beside her beloved husband Willie at the Tuscoola Mountain Cemetery in Chetwynd, BC. A Celebration of Life and interment will be held in the summer of 2021; details will be announced at a later date.

Respectfully,  
The family of Billie Jeanne Hauber

For 98 percent of the students at the school where my wife teaches, English is a second language. But that didn't stop them from giving her Christmas cards. Still, their enthusiasm for the occasion sometimes exceeded their grasp of English. Among the many cards that flooded her desk were: "Happy Birthday, Grandma," "Get Well Soon," and "Congratulations on Passing Your Driving Test!"

When I was 12, my father told me a terrible story that had happened at the gas station that day. "I was pumping gas when I noticed this small dog licking up a puddle of gasoline off the ground," he said. "All of a sudden, the poor thing started running around the car as fast as he could. He kept running and running until he finally just dropped to the ground right in front of me." I gasped, "Oh no. Was he dead?" Dad shook his head. "No, he just ran out of gas." Dad was quite pleased with himself over that one.

Do you have a loved one you'd like to remember this Christmas?

An Uber is cruising down a boulevard when it runs a red light. "Hey!" the passenger shouts.  
 "Be careful!"

"Don't worry," says the driver. "My brother does it all the time." He barrels through the next red light, and the passenger screams, "Stop doing that!"

"I'm telling you, my brother does this all the time." They approach the next light. Just when it turns green, the driver slams on the brakes. The confused passenger asks, "You just ran two red lights; why'd you stop at a green?" "I had to," says the driver. "My brother might have been coming."
